Limited means makes a rapid increase in the number of volumnes out of the question, yet during the year of 1900

thirty new books have been added to the library.

New Hampshire has been correctly termed "the mother of the free public library system," and no prouder or worthier boast could be advanced by any commonwealth. New Hampshire took the lead in the establishment of a state library. The first legislative grant for the object was made whilst the state was still a colony, although on the eve of independence. More than forty years passed before the example set at Concord by the state of New Hampshire, was imitated; hence it is that the past century witnessed the establishment and rapid growth of these institutions, which have proven such important factors in the intellectual improvement of mankind. Surely the library history of our state is one of which its citizens can justly be proud. I am afraid our smaller towns, like "little Monroe," do not appreciate the benefits of a library. Let us remember that the term "free public library" means a library which is the property of the town itself. It is established by state laws, is supported by local taxation and voluntary gifts. Great care has been taken in our town to have the library what its founders intended, and what its title implies. Let each individual patronize this institution, and do all possible to help along the good cause.

Respectfully submitted,
MRS. W. E. EMERY, Librarian.
